

Nanōmix featured in Frost & Sullivan's Cooltech session at GIL 2013

Emeryville, CA (September 9, 2013) - Nanōmix Inc., (Nanōmix), is a leading nanotechnology company focused on the development of next generation point of care diagnostic tests to enable earlier and more accurate testing in pre-hospital and hospital settings. Delivering timely and effective patient care is a core focus of the company. One example is Nanōmix's Omega-3 Cardiac Panel designed to perform multiple in-vitro diagnostic assays simultaneously from a single whole-blood sample.

Nanōmix's Carbon Nanotube Biosensor technology for Point of Care testing was selected by Frost & Sullivan to be featured at GIL 2013: Silicon Valley as one of six technologies that will change the world.
